28 June 1974

HW:

While dubbing the Hunt-Buckley interview of May 12 for you, I put a half-hour thing with Peter Dale Scott on Side B for your possible interest. He dwells considerably on the role of narcotics traffic in WG and intelligence operations, and also comes up with an angle on Jack Ruby which I had forgotten if I'd ever known it: that JR in 1947 was a HUAC informer when GL was head of that body. Anyway, I thought you might also like to see what Scott had to say regarding the Bast-Colson caper, which in general agreed with what we thought we had figured out about it for ourselves.

Best,

jdw
